The Frames

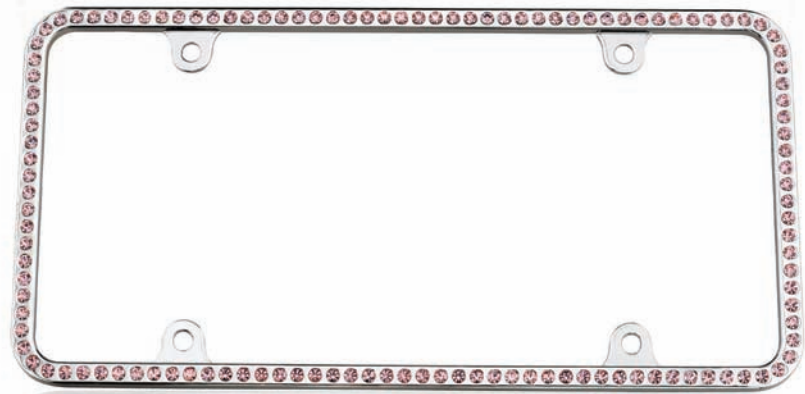

The VIP

The VIP frame is the world's premier license plate frame. Featuring 500 genuine Swarovski™ crystals and our patented construction process, the VIP frame is the choice of celebrities, musicians and athletes everywhere. Available in seven colors.

256 Series

Make other cars jealous with the 256 Series frame. With large Swarovski™ crystals and seven different colors, the 256 Series is pure luxe for your car.

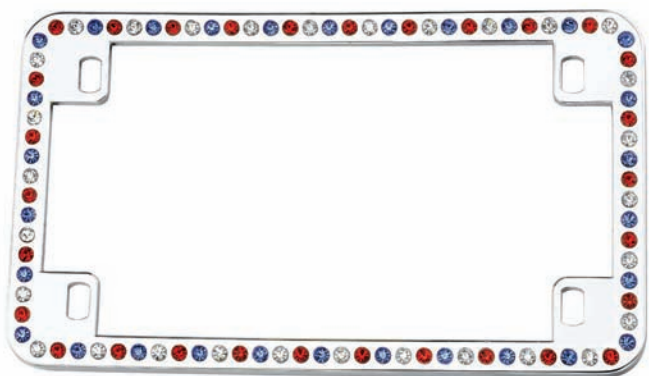

125 Series

The 125 Series is what every car deserves. The 125 frame features 125 Swarovski™ crystals, silky smooth chrome and expert craftsmanship.

Car & Motorcycle Jewelry

License2Bling emblems are the classiest accessories for your ride. Made with 3M adhesive backing and jewelry-like craftsmanship, L2B emblems are perfect on your car, bike and other creative places!

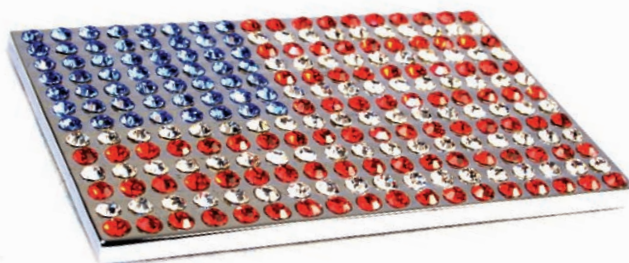

Motorcycle Frame

The L2B Motorcycle Frame features the same construction as our VIP frames. Choose ice, pink or USA crystal colors.

US Flag

The Swarovski™ US Flag is the perfect way to show your USA support. Features 234 crystals and jewelry-like craftsmanship. Size: 3" x 2"

Support Ribbons

With 74 Swarovski™ crystals, the L2B Ribbon is a surefire way to gain support for breast cancer awareness, troops or America. Size: 3" x 1.5"

Faith Fish

Show your faith with the L2B Faith Fish. Features smooth chrome, Swarovski™ crystals and hand made construction. Size: 4" x 1.5"

Technology:

Genuine Swarovski™

Each industry has its Rolex or Rolls Royce. In the crystal business, the ultimate is Swarovski™. For over 100 years Swarovski™ has provided jewelers with the most exquisite crystals for their products. From a distance and up close, nothing compares to genuine Swarovski™ crystals.

Chaton Crystals

A crystal is only as beautiful as the number of its sides. Chaton crystals (pointed back) are far and away superior to their flat back counterparts. With pointed back chaton crystals, the rainbow of colors and brilliance is rivaled only by real diamonds.

Precision-Bright Embedding™

All License2Bling products feature our proprietary Precision-Bright Embedding™ process. With Precision-Bright Embedding™, the crystals are set deep into the frame rather than glued onto a flat surface. Not only is the construction superior, but the visual effect creates more brilliants and shine.
